Subject:	RE: Question

I looked into this and I don't think it is an unreasonable request. It's possible Wakefield submitted the two numbers separately and the chemist did not recognize it as a potential trafficking case. Normally the chemist would have analyzed more than the one bag out of nine considering how close in total it was to 14 grams. This is one of those rare cases that should be resubmitted.

ELO

Marion,
Can you provide the lab number/case identifiers so that I can discuss with the lab?
Thanks, Julie

Subject: Question

Hi - how are you? We have a case that has come up where there are multiple bags of drugs-only one bag was weighted and the weight is an issue re Trafficking. The analyst has been great and offered to weigh all the bag-but, this was our issue before and I know that I promised that we would not make such requests a habit. Are you okay with their bringing it back to have the other bags weighted? Would you like us to follow some other practice?
Just let me know how you would like us to proceed-if you need to call me, my cell is ██████████
Thanks.
